
7th Annual Truist Securities Life Science Summit

May 4, 2021

Sutro Biopharma
NASDAQ: STRO

Forward Looking Statements

This presentation and the accompanying oral presentation contain “forward-looking” statements that are based on our management’s beliefs and assumptions and on information currently available to management. Forward-looking statements include all statements other than statements of historical fact contained in this presentation, including information concerning our future financial performance, business plans and objectives, current and future clinical and preclinical activities, timing and success of our ongoing and planned clinical trials and related data, the timing of announcements, updates and results of our clinical trials and related data, timing and success of our planned development activities, our ability to obtain and maintain regulatory approval, the potential therapeutic benefits and economic value of our product candidates, potential growth opportunities, financing plans, competitive position, industry environment and potential market opportunities.

Forward-looking statements are subject to known and unknown risks, uncertainties, assumptions and other factors, including risks and uncertainties related to our cash forecasts, our and our collaborators’ ability to advance our product candidates, the receipt and timing of potential regulatory submissions, designations, approvals and commercialization of product candidates, the timing and results of preclinical and clinical trials, and the expected impact of the COVID-19 pandemic on our operations. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. These factors, together with those that may be described in greater detail under the heading “Risk Factors” contained in our most recent Annual Report on Form 10-K, Quarterly Report on Form 10-Q and other reports the company files from time to time with the Securities and Exchange Commission, may cause our actual results, performance or achievements to differ materially and adversely from those anticipated or implied by our forward-looking statements.

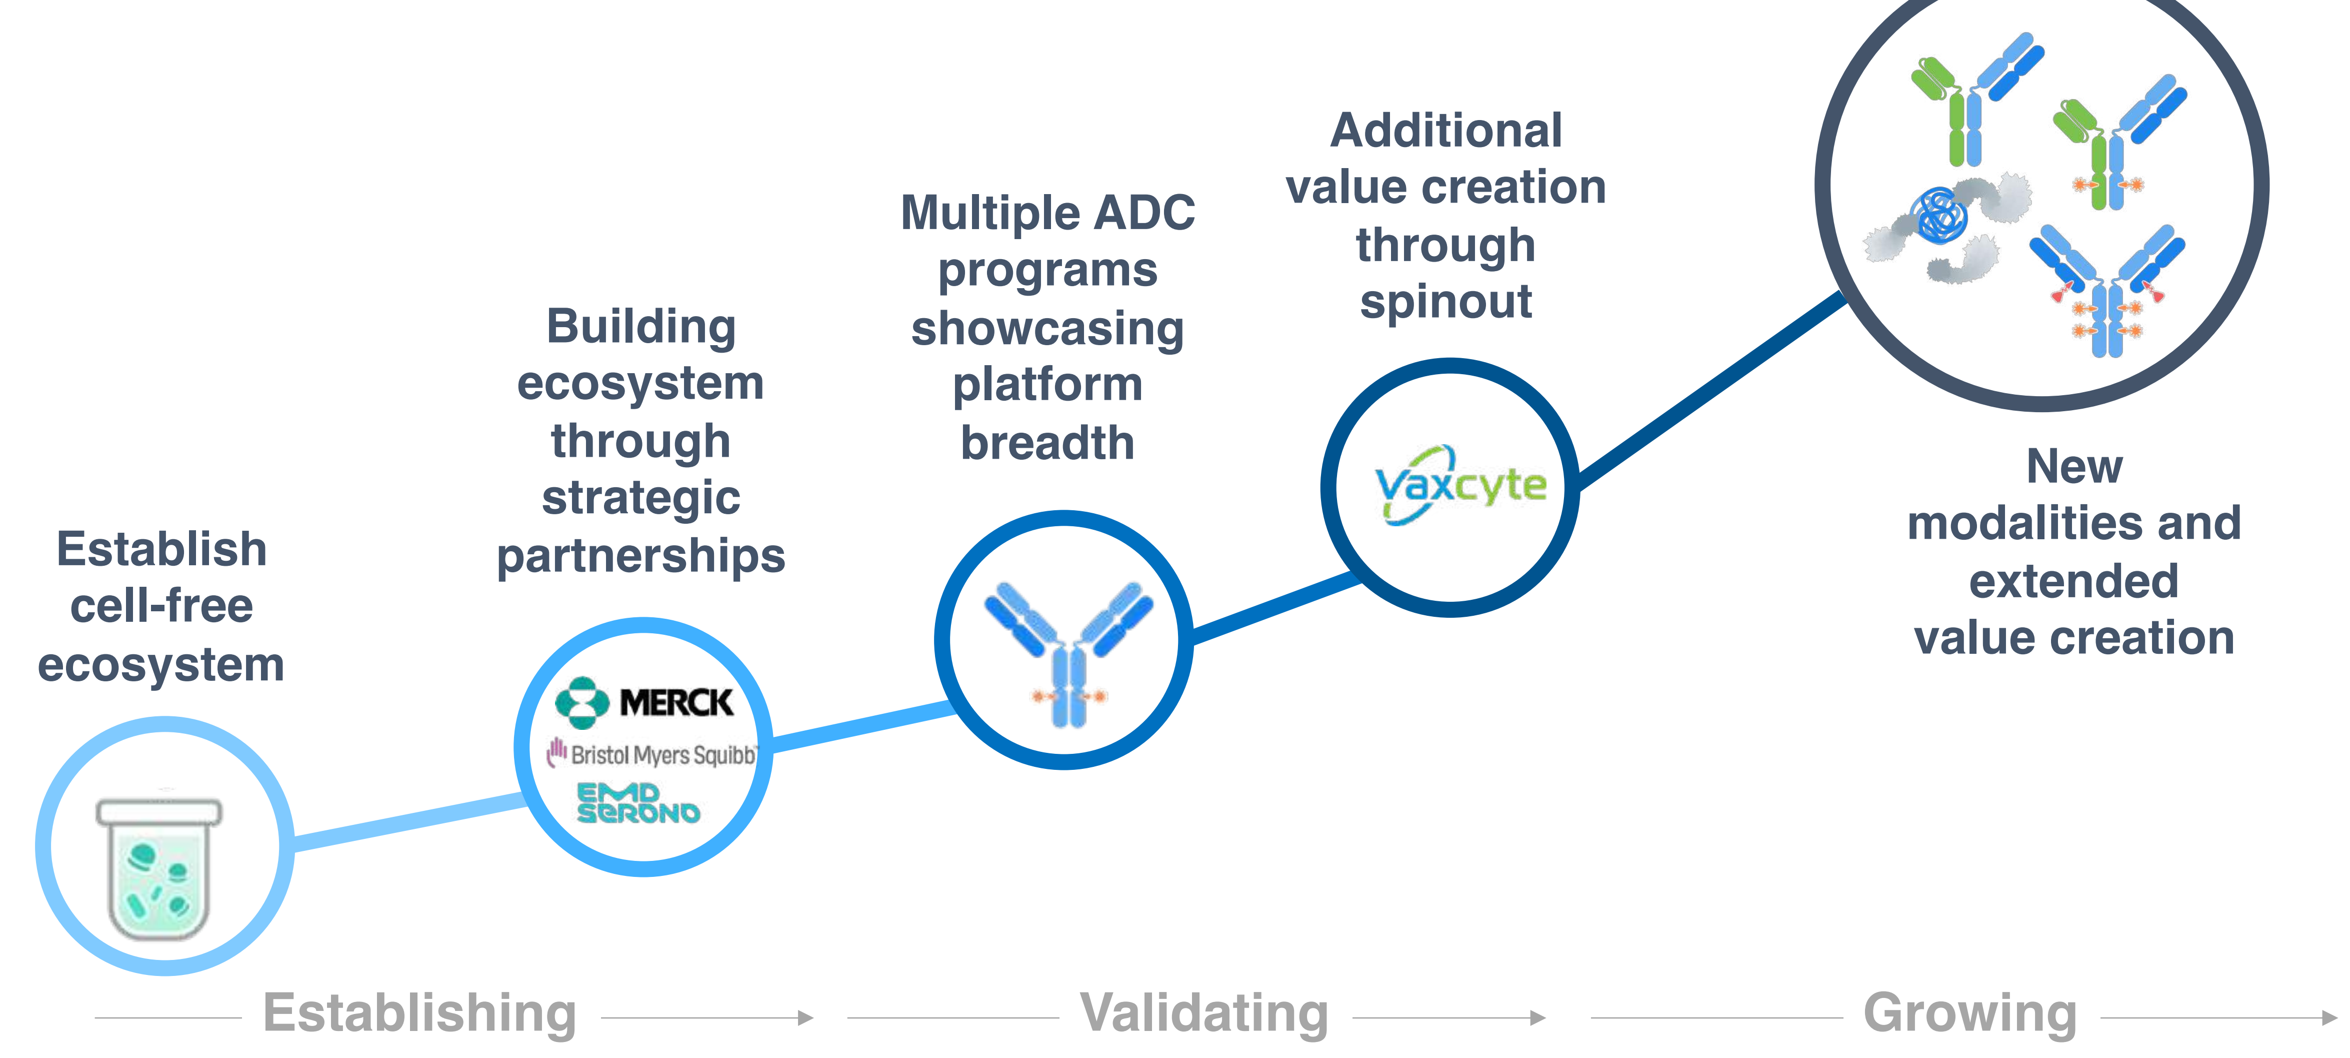
You should not rely upon forward-looking statements as predictions of future events. Although our management believes that the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances described in the forward-looking statements will be achieved or occur. Moreover, neither we nor our management assume responsibility for the accuracy and completeness of the forward-looking statements. We undertake no obligation to publicly update any forward-looking statements for any reason after the date of this presentation to conform these statements to actual results or to changes in our expectations, except as required by law.

This presentation also contains estimates and other statistical data made by independent parties and by us relating to market size and growth and other data about our industry. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. In addition, projections, assumptions, and estimates of our future performance and the future performance of the markets in which we operate are necessarily subject to a high degree of uncertainty and risk.

This presentation shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state or other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or other jurisdiction.

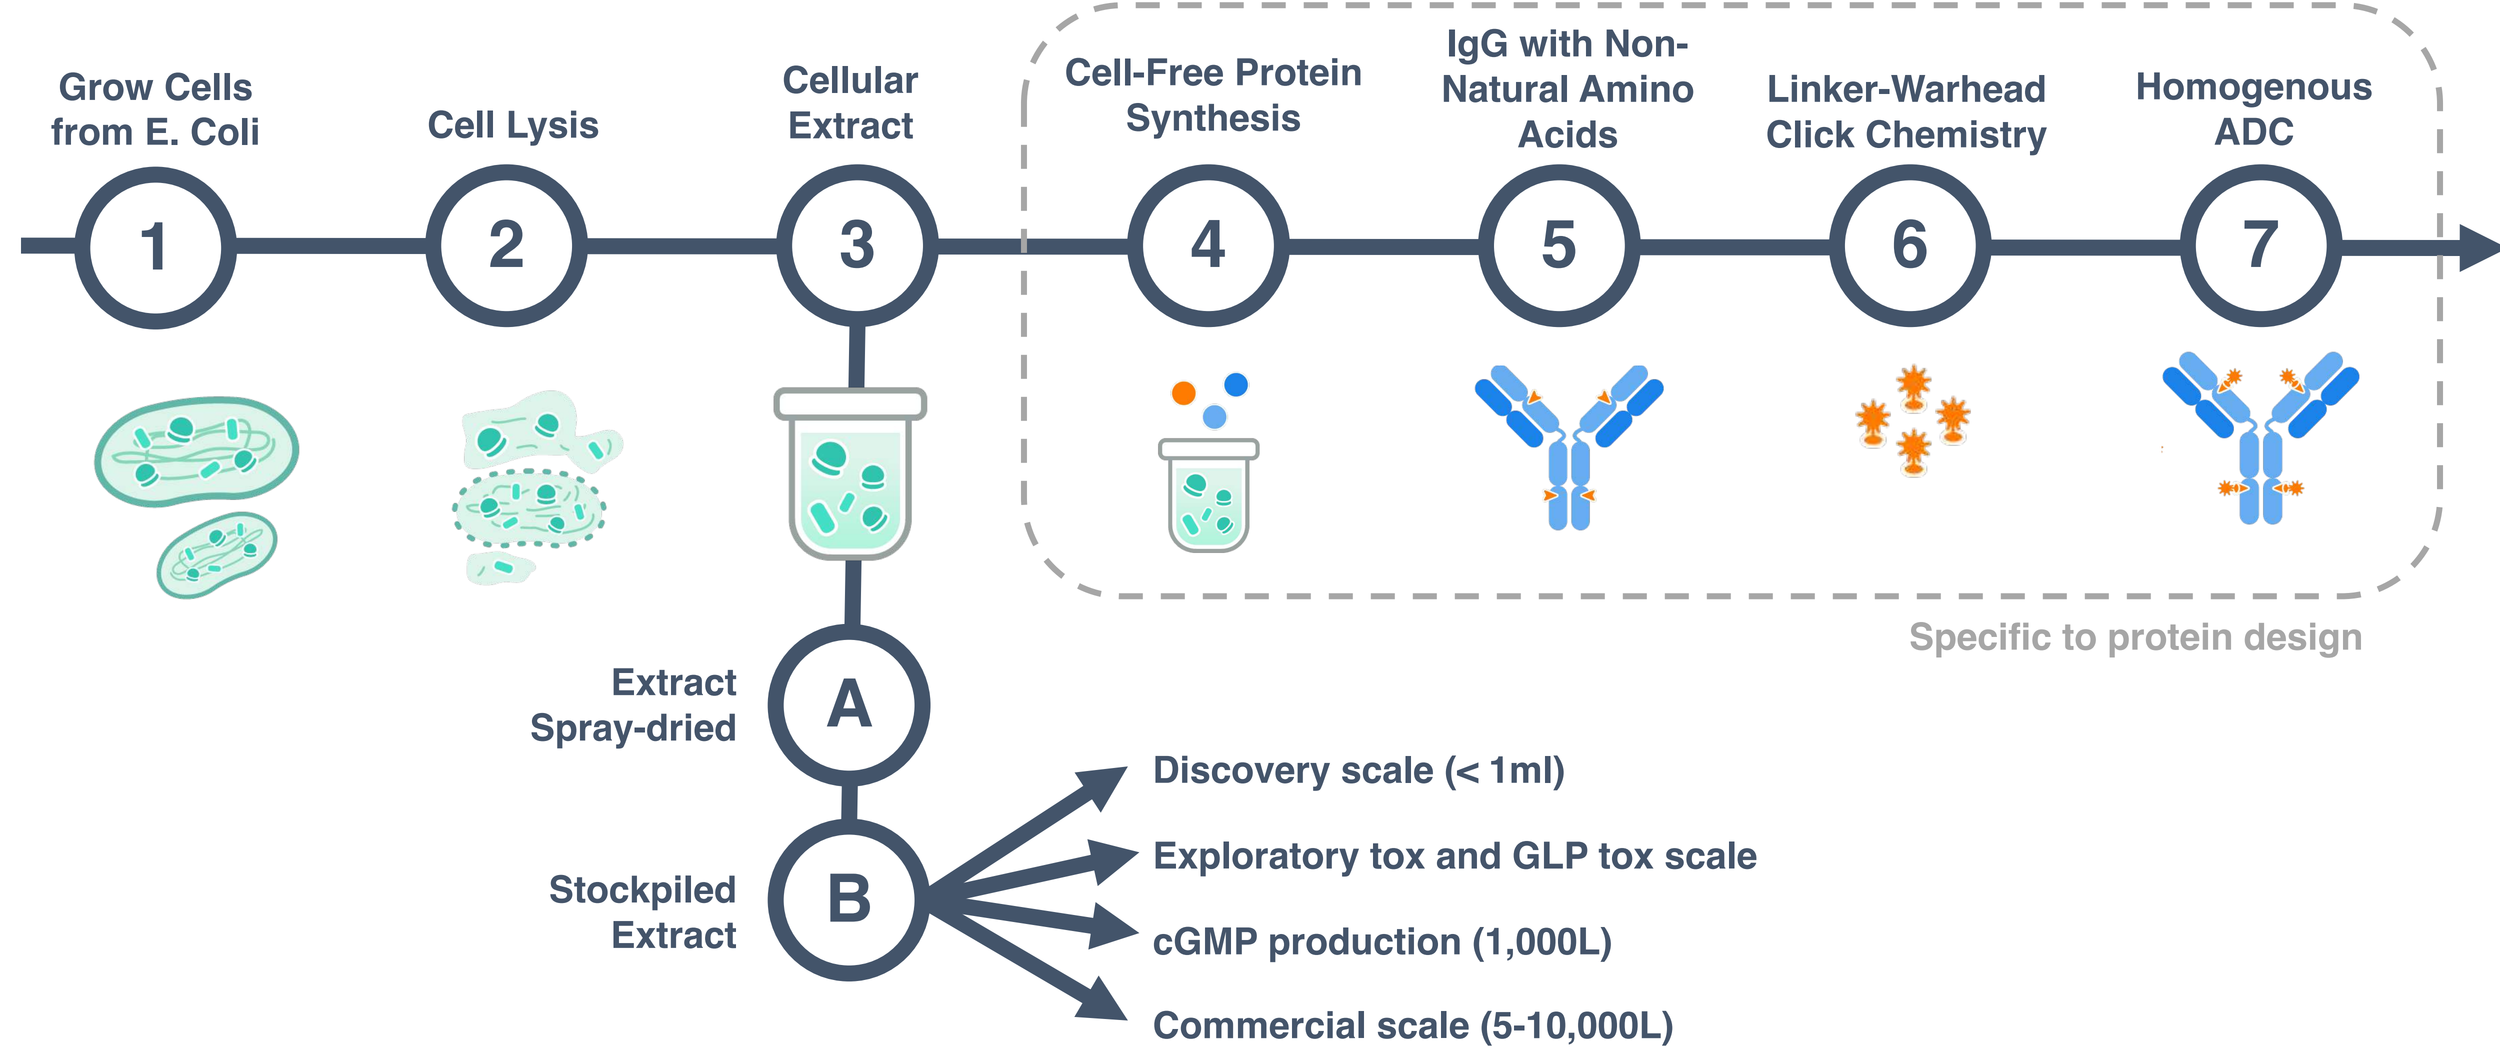
Pioneer and Leader in Cell-Free Technology

Expanding cell-free beyond ADCs



Industry Leading Cell-Free Protein Synthesis Platform

GMP production yields consistent and scalable end-products



NON-CONFIDENTIAL

Advantages of Precision Protein Therapeutics

Homogenous, precisely designed complex biologics with optimized performance

Challenges in Traditional Cell-Based Complex Biologics Discovery and Manufacturing

Months to discover lead drug candidates using **transient stable cell lines** evaluating a handful of candidates

Conjugations incomplete and unstable creating poorly optimized products, especially with increasing complexity in conjugations

Heterogeneous mixtures have less favorable therapeutic window due to varying performance of each species

Cell-based production requires **different process with scale, causing complexity and unreliability** with CMC and manufacturing

Advantages of Sutro's Cell-Free Synthesis Platform for Best-in-Class Biologics

Create in parallel, in weeks, hundreds of protein variants to **empirically select the best** lead candidate based on ***in vivo* performance**

Click chemistry and non-natural amino acids **completely conjugate at precise positions**, without loss of efficiency even with increasing complexity

Precisely designed proteins in a **homogeneous product widens therapeutic window** due to the selection of the best single species

Cell-free production is scalable – the same process **in lead discovery** as at **commercial scale**

NON-CONFIDENTIAL

Cell-Free Platform is a Proven IND Engine

Four product candidates in the clinic and other late-stage discovery programs in various modalities

Program	Discovery / Preclinical / Phase 1/1b / Phase 2/3 (indication)	Commercial Rights

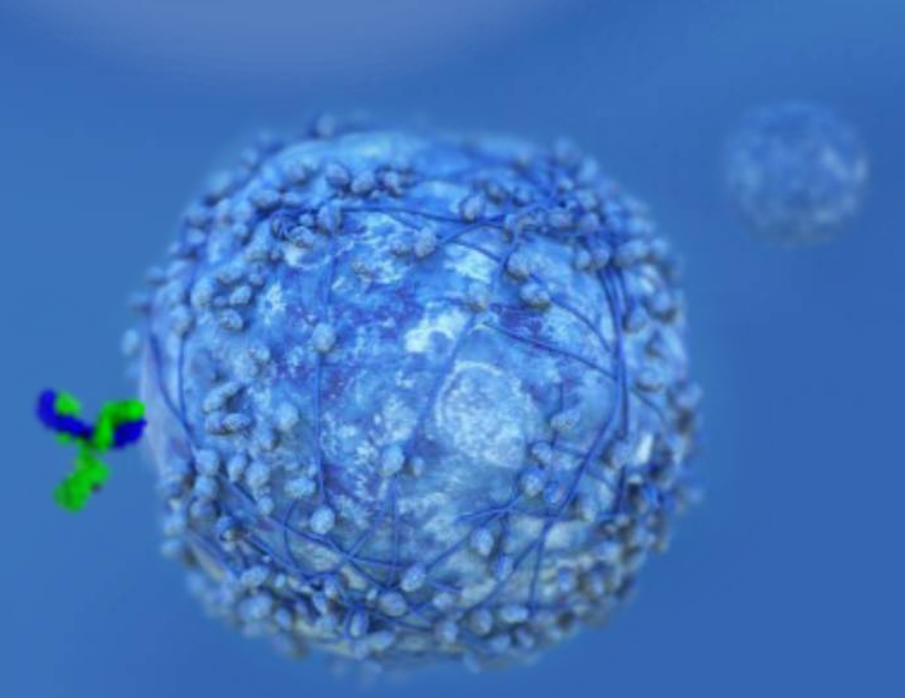
VAX-24 24-Valent Pneumococcal Conjugate Vaccine	**Invasive Pneumococcal Disease**	Vaxcyte (2)

(1) EMD Serono is the biopharmaceutical business of Merck KGaA, Darmstadt Germany in the US
(2) Sutro owns 4% royalties on net sales of VAX-24

NON-CONFIDENTIAL



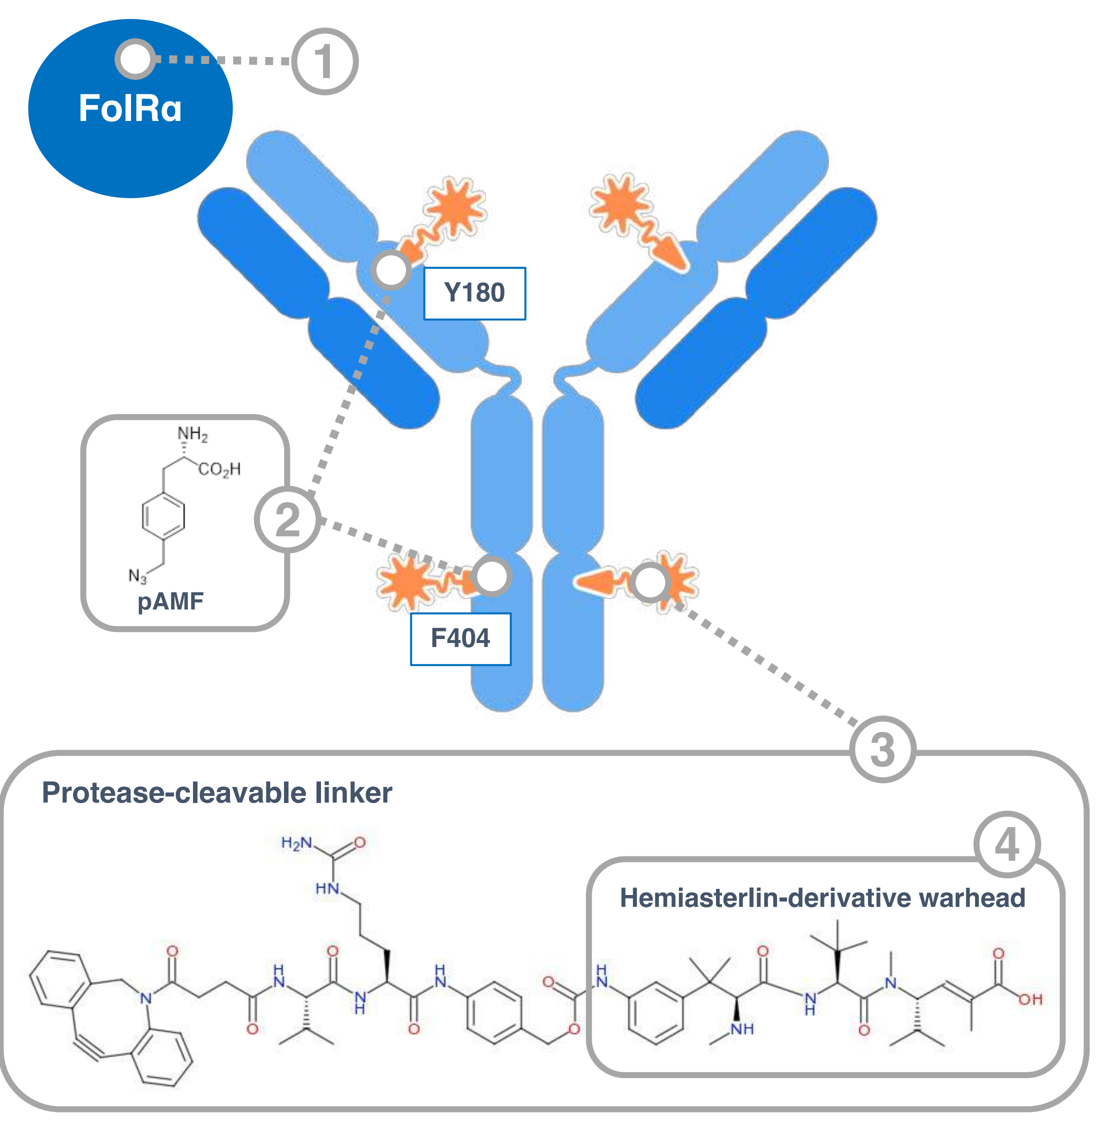
STRO 002

FolRα-Targeting ADC

Potential Best-in-Class ADC for Ovarian and Endometrial Cancers

Potential Best-in-Class ADC for Ovarian and Endometrial Cancers

FolRα targeting ADC with potentially dual mechanism of action



STRO-002 is a homogeneous **antibody drug conjugate (ADC)** with a **drug-antibody ratio (DAR) of 4**, targeting folate-receptor alpha (**FolRα)**:

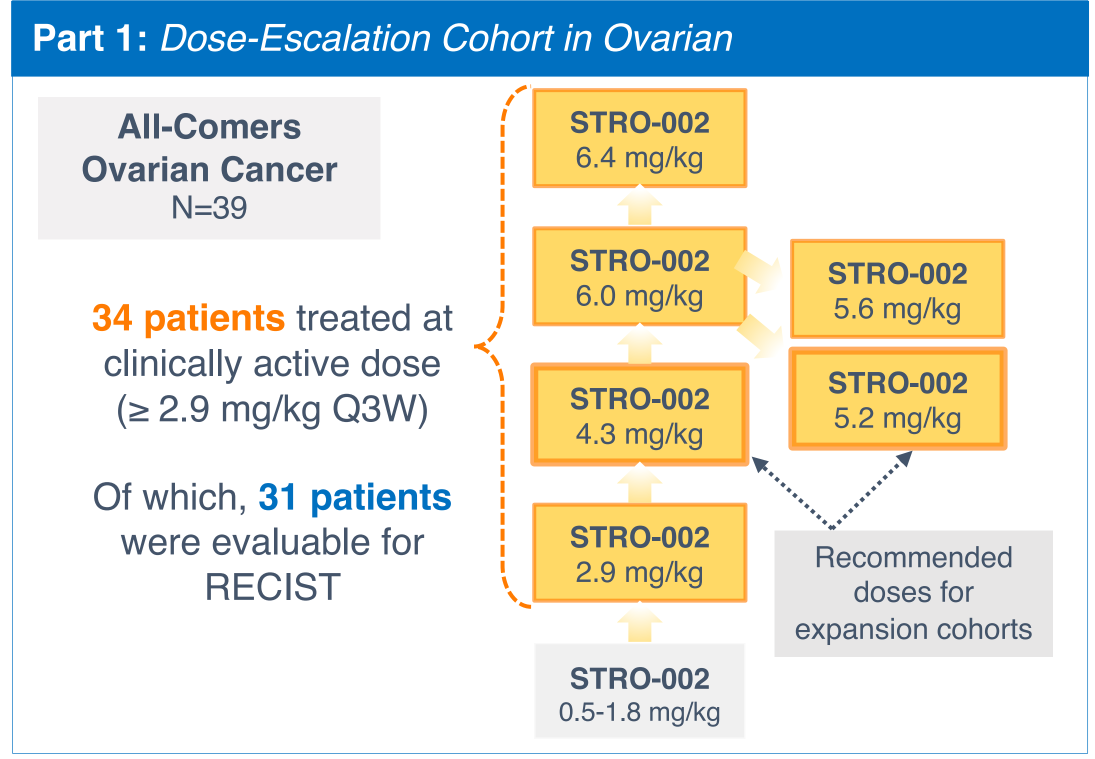
1. **FolRα** is overexpressed in certain cancers including **ovarian cancer** and **endometrial cancer**
2. Precisely positioned **non-natural amino acids**, p-azidomethyl-L-phenylalanine, at positions Y180 and F404 on the heavy chain
3. **Stable protease-cleavable linkers**, with rapid clearance of toxic catabolite after release and cell killing
4. Warhead is hemiasterlin-derivative(1) with potentially **dual mechanism** against the tumor – **tubulin-inhibitor cytotoxin, less sensitive to P-gp transport** and provides **immunogenic response upon cell death(2)**

(1) Sutro-proprietary tubulin-targeting 3-aminophenol hemiasterlin warhead, SC209
(2) Based on STRO-002 pre-clinical models showing immune stimulation at site of tumor upon cell death

NON-CONFIDENTIAL

STRO-002 GM1 Phase 1 Two-Part Design

Dose-escalation has been completed and data was presented December 2020



Study Update:

- Enrollment completed August 2020
- Company provided updated data on December 3, 2020, as of October 30, 2020 cutoff

Baseline Characteristic	All Patients N=39
Median age	61 years (range: 48–79)
Median time since diagnosis	**3.9 years** (range: 0.6–17.0)
Median number of prior lines of therapy	**6 lines** (range: 2–11)
Previous therapies, n	
Platinum	**39 (100%)**
≥ 3 prior platinum regimens	**18 (46%)**
Taxanes	38 (97%)
Bevacizumab	32 (82%)
PARP inhibitors	**23 (59%)**
Checkpoint inhibitors	**8 (21%)**
Experimental therapy	14 (36%)

Note: Data as of October 30, 2020 and presented at Company Event on December 3, 2020

NON-CONFIDENTIAL

STRO-002 Was Generally Well Tolerated

86% of TEAEs remain Grade 1-2 and no observed ocular toxicity signal

Dose Levels in Dose-Escalation

Dose Levels (Q3W)	All Patients (N=39)
0.5 mg/kg, 1.0 mg/kg, and 1.8 mg/kg	5 (13%)
2.9 mg/kg	**3 (8%)**
4.3 mg/kg	**5 (13%)**
5.2 mg/kg	**12 (31%)**
5.6 mg/kg	**3 (8%)**
6.0 mg/kg [1]	**10 (26%)**
6.4 mg/kg [1]	**1 (3%)**

Common TEAEs > 25% By Grade [2]

All Safety Evaluable Patients	Grade 1 N (%)	Grade 2 N (%)	Grade 3 N (%)	Grade 4 N (%)	Overall (N=39) N (%)
Fatigue	8 (21)	17 (44)	4 (10)	0	29 (74)
Nausea	15 (39)	10 (26)	0	0	25 (64)
Constipation	12 (31)	12 (31)	0	0	24 (62)
Neutropenia	0	1 (3)	9 (23)	13 (33)	23 (59)
Arthralgia	8 (21)	7 (18)	6 (15)	0	21 (54)
Decreased appetite	10 (26)	10 (26)	0	0	20 (51)
Neuropathy	3 (8)	12 (31)	3 (8)	0	18 (46)
Abdominal pain	7 (18)	5 (13)	3 (8)	0	15 (39)
AST increased	10 (26)	2 (5)	1 (3)	0	13 (33)
Dizziness	10 (26)	3 (8)	0	0	13 (33)
Vomiting	8 (21)	5 (13)	0	0	13 (33)
Diarrhea	8 (21)	3 (8)	1 (3)	0	12 (31)
Headache	7 (18)	3 (8)	0	0	10 (26)
Insomnia	6 (15)	4 (10)	0	0	10 (26)
Pyrexia	8 (21)	2 (5)	0	0	10 (26)

(1) MTD was not reached; DLTs occurred in 2 patients: Grade 2 neuropathy/Grade 3 arthralgia at 6.0 mg/kg and Grade 3 bone pain at 6.4 mg/kg
(2) Not included in table are two Grade 5 events, both previously reported and unrelated to study drug by investigator assessment: death not otherwise specified and acute GI bleed
Note: Data as of October 30, 2020 and presented at Company Event on December 3, 2020

Note: Data as of October 30, 2020 and presented at Company Event on December 3, 2020

NON-CONFIDENTIAL

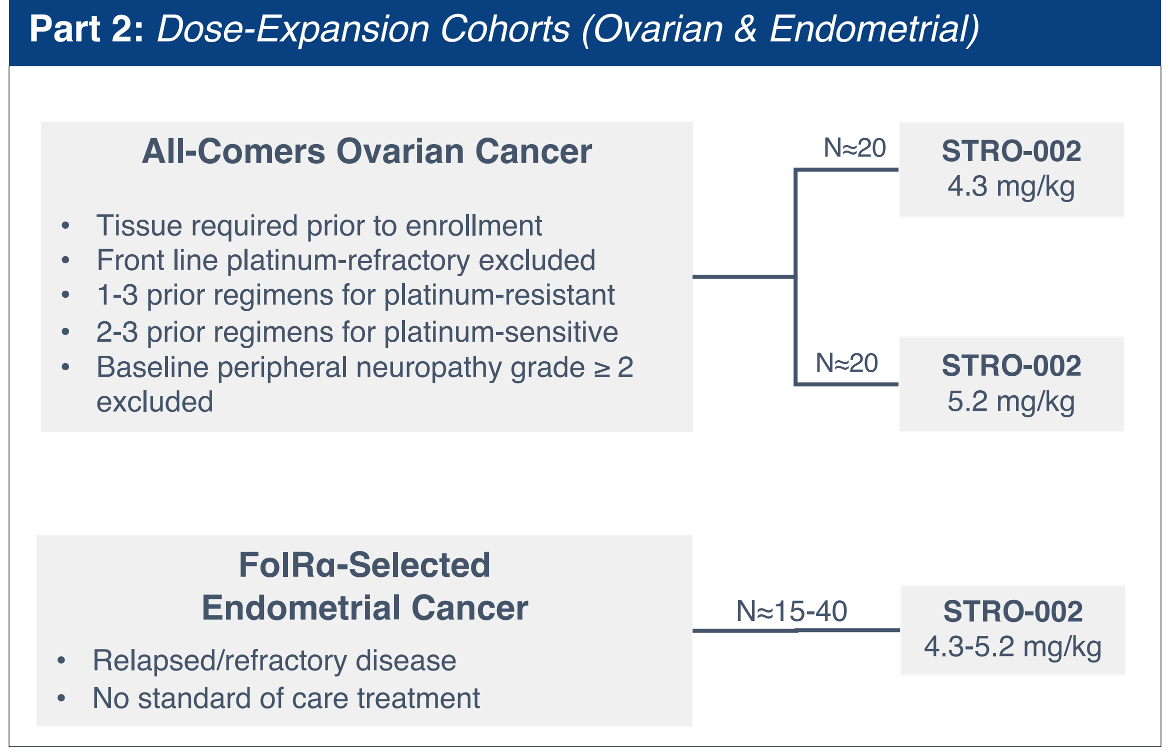
Path Forward for STRO-002 Clinical Development

Next steps for moving towards registration-directed study

Determine optimal efficacious dose that is well-tolerated and maintains **dose intensity**

Study will begin with **All Comers** and ongoing expression analysis will **inform subsequent enrichment strategy**

Characterize efficacy and safety profile in **less heavily pre-treated population** to inform **registration-directed study**



Key Endpoints:
Objective Response Rate, Safety, PK Profile, Duration of Response, Progression Free Survival, Overall Survival, CA-125 Responses

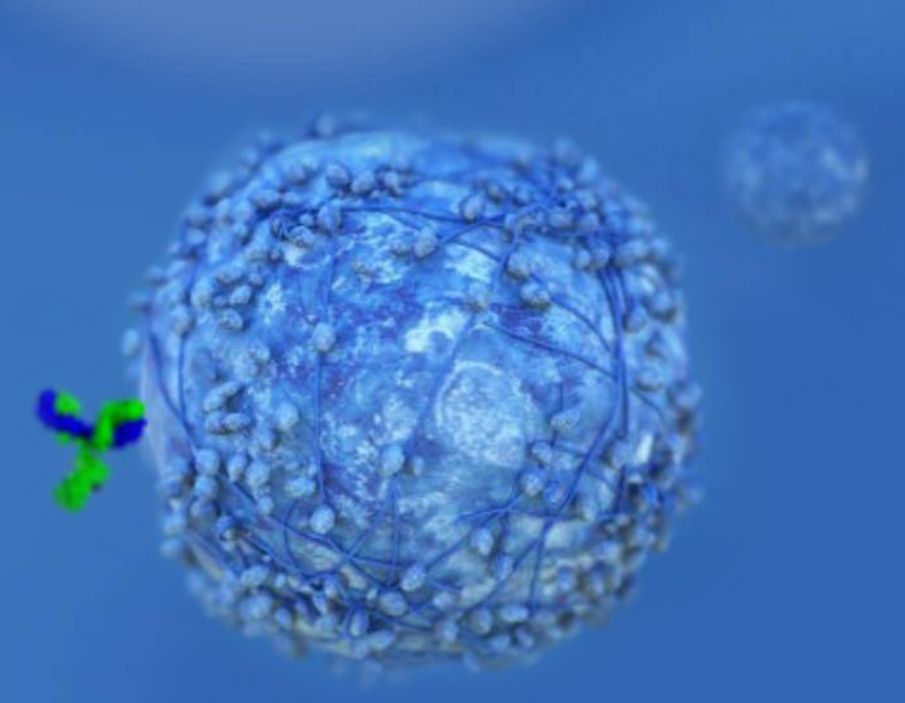
First patient for ovarian cohort dosed **January 2021**

Plan to target **≈35 sites in US & Europe**

Anticipated preliminary data in ovarian cancer **2H 2021**

Anticipated **EOP1/2** FDA meeting in 2H 2021

NON-CONFIDENTIAL

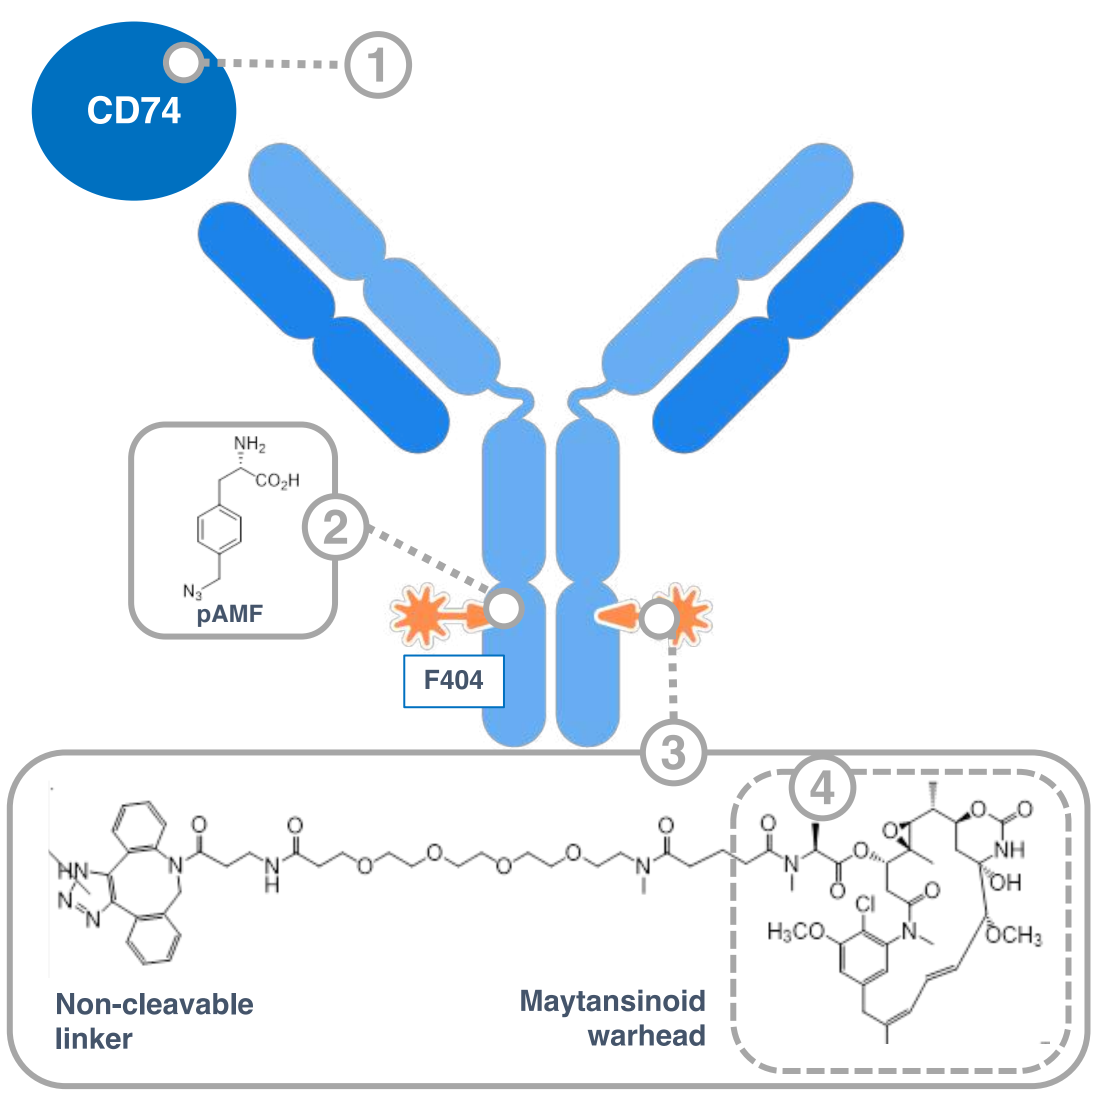


CD74-Targeting ADC

Potential First and Best-in-Class
ADC for B-Cell Malignancies

Potential First-in-Class Molecule for Patients with NHL and MM

Stable CD74 targeting ADC for hematological cancers designed to minimize bystander effects



STRO-001 is a homogeneous **antibody drug conjugate (ADC)** with a **drug-antibody ratio (DAR) of 2**, targeting **CD74**:

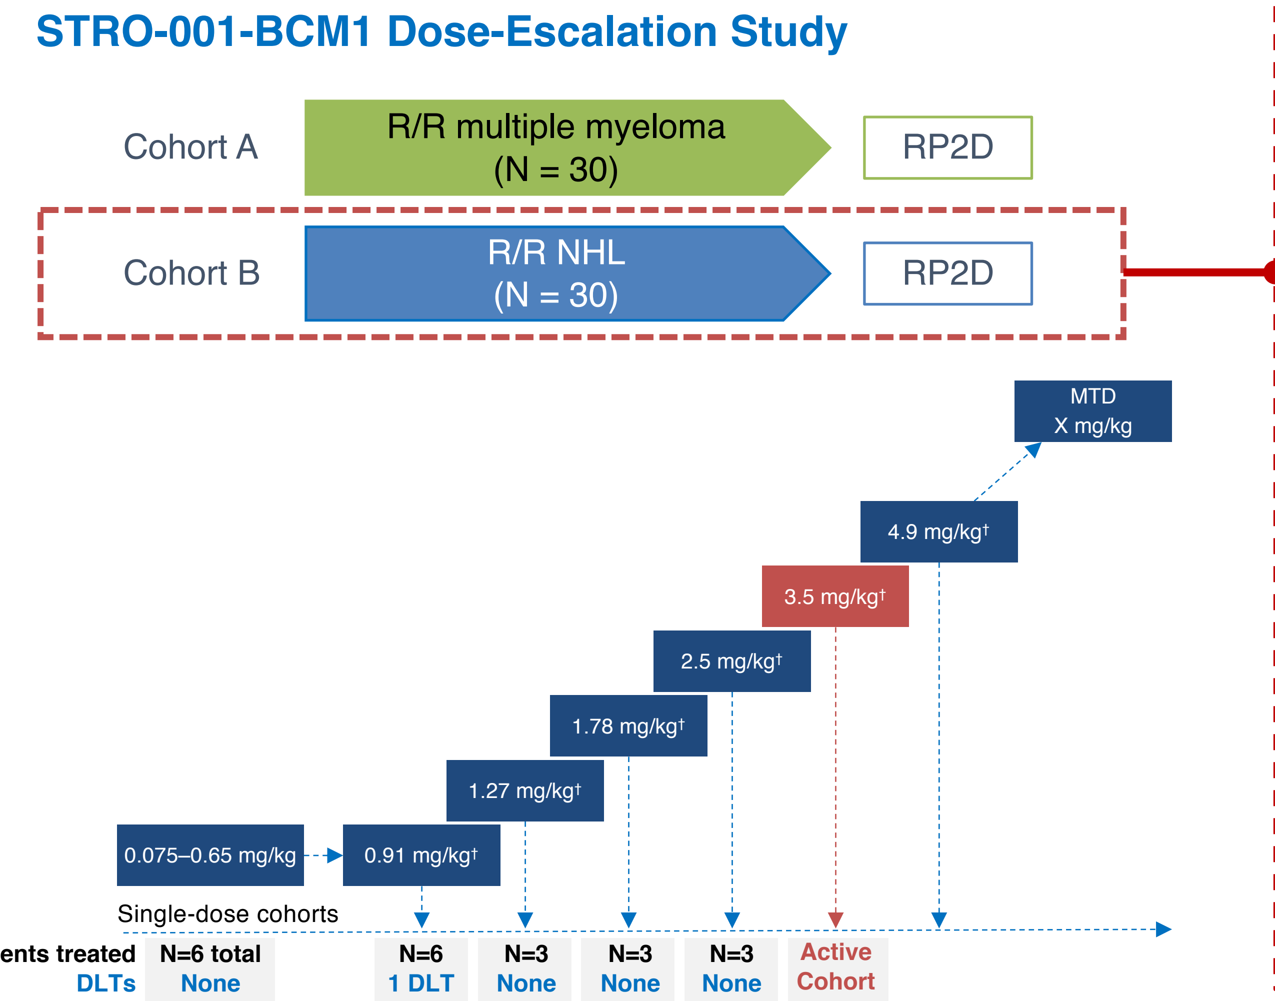
1. **CD74** is expressed in many **hematological cancers** and **rapidly internalized**
2. Conjugation through precisely positioned **non-natural amino acids.** p-azidomethyl-L-phenylalanine, at positions F404 on the heavy chain
3. Comprises two non-cleavable linker-warheads that are **stable in circulation**
4. The active catabolite, **Maytansinoid** derivative, efficiently kills tumor cells following internalization of the ADC and was designed to **minimize bystander effects**

NON-CONFIDENTIAL

STRO-001-BCM1 Study Design and Updates

Ongoing Phase 1 dose-escalation study with NHL update at ASH 2020

STRO-001-BCM1 Dose-Escalation Study



NHL Cohort Update at ASH 2020

A total of **21 patients** have been treated with STRO-001 and **18 patients** were evaluable for response as of October 30, 2020

Dose range 0.05-2.5 mg/kg and **MTD has not been reached**

1 DLT of grade 3 pulmonary embolism was observed [(1)]

Following previously announced **protocol amendment** requiring pre-screening for patients at risk for thromboses, **no additional thromboembolic events** have been observed

Dosing frequency was modified from Q2W (28-day cycle) to **Q3W** (21-day cycle) for doses ≥ 0.91 mg/kg

(1) DLT disclosed in 2019, patient with bulky lymphadenopathy and concurrent DVT receiving 0.91 mg/kg Q3W
Note: Data as of October 30, 2020 from ASH 2020

NON-CONFIDENTIAL

ASH 2020 Update in NHL Cohort

Heavily pre-treated patient population with 5 median lines of prior therapies

Baseline Characteristic	(N=21)
Age, median (range), years	64.5 (21–82)
Time from diagnosis, median (range), years	6.0 (1.0–29.8)
NHL subtype, n (%)	**21 (100)**
